| 6. Colonal Tancey reviewed SAC plans. Based on the assumption that as of movember Detachment C, now situated at would deploy overseas on date, SAC would move in the same master of personnel for 60 days training of for the U-2 as musicus complement for further squadron training. On or faut 20 March, training would be complete. Whether SAC would then leave on that date would be dependent on whether another base would be available. At moment SAC is planning to have another base by 1 February, although its location at present unknown. Tie-in contracts to FAK and preparations for such were (sub-specially) made on 5 October. SAC training is at present identical to past training that exception of more emphasis on instructor qualifications. SAC squadron strengt to be 126, or, 66 airman and 60 cificers. Conclusions reached through the siring of the above two paragraphs were that,  species problems set saide, SAC states it is incompatible to have a SAC detachment  ACCATONE personnel on the same base. Security is a part of the problem. In  y event, a special briefing of base and lockhood personnel is planned concerning  a training of previous detachments. The SAC persons present voiced the strong de-  traination of General Lower on the absolute need for the separation of SAC and  CATONE units at  | 25             |
